

Vigilant Solutions To Protect Vital Assets and Data

Physical & Information Security Services

Survive & Thrive in a High-Threat Environment

Regulatory, audit and compliance requirements are proliferating in response to rapidly evolving information security threats. Your organization may be struggling to handle growing numbers of customers and the expanding infrastructure required to serve them with new secure technology deployments and innovative services. Whether it's compliance or contractual requirements driving the need to examine your information security management processes, you require the assistance of a partner skilled in all aspects of Physical & Information Security.

Partner with Experienced Professionals

MAXIMUS has a long history of successful experience in helping public sector

organizations to assess internal and external threats thoroughly in order to protect their physical infrastructure and information assets. Our experts have been working in this field almost as long as it has existed, particularly in the highly regulated areas of public health care, energy, tele-communications and finance for state and local governments.

Gain Critical Insights from a Proven Methodology

Specifically, MAXIMUS applies a well-established Threat & Risk Assessment methodology in a phased process, beginning with analysis of existing documentation on security strategy, initiatives, requirements, methodologies and standards. We identify each class of information asset within the Asset Inventory and prioritize by criticality and sensitivity.

MAXIMUS identifies potential threats to both security and compliance, giving you customized threat profiles and an evaluation of current controls. We assess actual risk by calculating the likelihood of the threat occurring and the impact if a threat agent exploits the vulnerability. We then correlate actual risk with your tolerance for risk. All this allows us to provide you with a detailed Risk Assessment Report, which includes a description of risks and associated vulnerabilities along with recommended mitigation initiatives. The end result is a reliable,

Snapshot

MAXIMUS Physical & Information Security Services address all the principal risk areas within the IT area, including:

- Infrastructure controls
- IT security policies, processes and standards
- Organizational and physical facility security
- Asset classification and control
- Application testing
- External penetration testing
- Internal control testing
- Communications and operations management
- Access control architectures and technologies
- Coordination with Independent Verification & Validation

We provide a detailed map to guide clients to a reliable Information Security Program.

high-level road map enabling your organization to build and deploy an Information Security Program that addresses process deficiencies and gaps, and includes detailed metrics to enable ongoing performance measurement in support of continuous improvement.

Security Assessment Based on Secure Methods

The Threat & Risk Assessment methodology MAXIMUS applies is reliable and has been tested in practice with notable success across a wide range of government enterprises. Clients can take confidence in the fact that it is based on well known risk management frameworks and processes that are compliant with ISO 17799:2005, the NIST Risk Management Guide for IT Systems, COBIT and OCTAVE. The MAXIMUS Security Assessment professionals who partner with you to implement this proven methodology work in close collaboration with your in-house staff. We never offer pre-packaged solutions because each client and each project is unique.

Choose a Reliable Partner with a Personal Approach

In choosing MAXIMUS, you get all the reliability of a large, financially stable company delivered by small, focused teams of professionals. Our more than three decades of experience nationwide and worldwide has given MAXIMUS a global perspective, knowledge leadership, best practices and a "deep bench" of subject

Success in Action

The MAXIMUS security and audit team was approached to identify the risks related to implementation of technical and security controls an organization's IT program. The results of the audit revealed problems not only with the integrated technologies, but also with the associated procedures. Instead of recommending quick-fix patches, MAXIMUS experts recognized the opportunity to assist the client by providing solutions that went deeper and solved more than just the immediate problems. The MAXIMUS solution addressed the policies and procedures needed to maintain the long-term security posture of the organization.

matter experts and disciplined project managers. Facing an environment of rapidly evolving information security threats and expanding IT security regulations, you can have confidence in your choice of MAXIMUS as a trusted Physical & Information Security partner.

One Focus, One Source

MAXIMUS has maintained a single focus on government service since 1975. It is our sole purpose, and we are passionate about being the premier provider in our field. Our dedicated professionals help government agencies provide essential human services to children, adults and families in need. We combine 35 years of health and human services program experience with innovative thinking and a caring attitude of partnership and shared goals. Every process, procedure and project we undertake is empowered with deep subject matter expertise focused on delivering high-quality cost-effective solutions that help government agencies fulfill their missions. We invite you to contact MAXIMUS to discuss how our comprehensive range of health and human services capabilities can support your needs.
